# Tejasvi

**U17 Girls** · Fleet size: 39 · Sail #39

| FINAL RANK | NETT POINTS | BEST RACE | RACES SAILED / 10 |
|---|---|---|---|
| 35 | 320.0 | 31 | 6<br>clean finishes |

## 1 Executive Summary

Tejasvi competed in U17 Girls at the 2026 Techno 293 World Championships in Foça, Turkey. Final rank: **35 / 39**. This profile consolidates all GPS-derived performance metrics, wind-band specific results, and a 24-category evaluation framework. Data-driven ratings are auto-computed; observational ratings must be filled in by the coach during 1:1 debrief.

## 2 Wind-Band Performance (A/B/C/D/X)

How this athlete compares to the Class Top 5 **in the same wind condition**. The score is a VMC composite — mean of (UW VMC %, DW VMC %) vs Top 5 in that band. Reach legs are excluded. **100%** = matches Top 5, **80%** ≈ 20% slower toward the next mark. Route Efficiency is intentionally excluded from the composite — following the same route as Top 5 while trailing behind is not a positive signal.

| BAND | CONDITION | RACES · AVG FINISH | VMC % OF TOP 5 |
|---|---|---|---|
| A | Very Light ≤5 kn | No races | |
| B | Light 5–8 kn | **n=3** Avg Finish: 33.3 | **76%** ⚠ low-pointing (spd 81%) |
| C | Medium 9–12 kn | **n=1** Avg Finish: 34.0 | **50%** ⚠ low n |
| D | Strong 13–16 kn | **n=1** Avg Finish: 32.0 | **58%** ⚠ low n |
| X | Heavy 17+ kn | No races | |

### HOW TO READ THE PERCENTAGE

The percentage is a **VMC composite** — mean of this athlete's Upwind VMC and Downwind VMC, each compared to the Class Top 5 average in the same wind band. VMC = speed toward the next mark, so this number answers: *"how fast is this athlete progressing toward the mark compared to the top sailors in the same wind?"*

Tier colors: **≥95% gold** · **≥85% emerald** · **≥75% sky** · **≥60% amber** · **≥45% orange** · **<45% red**.

**Avg Finish** is shown next to race count as a ground-truth anchor: when VMC% looks good but Avg Finish is poor, the boat-speed is fine but starts/tactics/shift-calls are the problem. When both are poor, boat speed itself is the limiter.

**Flags:** ⚠ low n means the sample is n ≤ 2 (treat as noisy); ⚠ nav disaster means one or more races had route efficiency <50% (>2× ideal distance); ⚠ low-pointing means raw speed is ≥5pp higher than VMC — fast but pointing poorly.

## 3 Strengths & Weaknesses (by Wind Condition)

Strengths and weaknesses are computed **per wind band × per metric** then ranked globally. Band is stated **first** because T293 performance varies sharply with wind — a sailor strong in light air can be weak in 15+ kn. Percentage is the athlete's band mean divided by the Class Top 5 band mean.

### ▲ Top 3 Strengths

| | | | | |
|---|---|---|---|---|
| B | **Downwind VMG** | Light 5–8 kn · n=3 races | 81.3% | ★★★⯪☆ |
| B | **Upwind VMG** | Light 5–8 kn · n=3 races | 76.8% | ★★★⯪☆ |

### ▼ Top 3 Weaknesses

| | | | | |
|---|---|---|---|---|
| B | **Upwind VMG** | Light 5–8 kn · n=3 races | 76.8% | ★★★⯪☆ |
| B | **Downwind VMG** | Light 5–8 kn · n=3 races | 81.3% | ★★★⯪☆ |

**HOW TO READ THIS CARD**

Each row answers: *"In what wind band, for what metric, is this athlete strong/weak vs the Class Top 5?"*

**n** = number of races the athlete sailed in that band. Bands with **n < 3** are flagged ⚠ low n — the signal is noisier and must be confirmed over subsequent regattas.

The precise **percentage** is always shown; the **5 stars** are a fast visual tier (≥95% = 5★, ≥85% = 4.5★, ≥75% = 3.5★, ≥60% = 2.5★, ≥45% = 1.5★, <45% = 0.5★). Negative percentages are never used — a weakness is a low positive percentage; the gap to benchmark is simply *100 − pct*.

## 4 17-Category Evaluation Matrix

Data-driven (D2/D4) and GPS-inferred observational (C1/C2/C5, F1–F4) ratings are auto-computed from race data. A1/A2/A4, B1/B2/B3, and E1/E2 (pumping) are coach-rated (HIGH/MID/LOW/N/A) from the Coach Observational Comments master sheet.

### Data-Driven Categories (GPS / Sailwave)

| CODE | CATEGORY | TIER (★/5) | VALUE |
|---|---|---|---|
| D2 | **Upwind VMG**<br>Velocity Made Good to windward — speed × cos(angle to true wind) vs Top 5 | ★★★★★ | 41% |
| D4 | **Downwind VMG**<br>Velocity Made Good to leeward — speed × cos(angle to downwind) vs Top 5 | ★★★★★ | 64% |

### GPS-Inferred Observational Categories (Auto-Rated)

| CODE | CATEGORY | TIER (★/5) | VALUE |
|---|---|---|---|
| C1 | **Course Selection Pre-Start**<br>Reads committee boat vs pin bias, wind shifts, current<br>*Side agreement with Top 5 course choice on UW legs · n=4* | ★★★★★ | 85% |
| C2 | **Start Line Positioning**<br>Chooses correct section of line, defends gap, avoids bad lanes<br>*Fleet percentile at first WM rounding (start quality proxy) · n=4* | ★★★★★ | 13% |
| C5 | **Start Focus & Line Judgement**<br>Timing, line judgement, commitment in final 10 sec<br>*% of starts in top half at first WM (0/4 races) · n=4* | ★★★★★ | 0.0% |
| F1 | **Tacking Technique**<br>Entry timing, foot work, rig/board balance, exit angle & speed retention<br>*UW VMG % of Class Top 5 — low = tack losses accumulating · n=4* | ★★★★★ | 41% |
| F2 | **Gybing Technique**<br>Board flattening, rig transfer, carve radius, pumping exit coordination<br>*DW VMG % of Class Top 5 — low = gybe losses / poor DW trim · n=4* | ★★★★★ | 64% |
| F3 | **Windward Mark Rounding**<br>Layline judgement, traffic management, bear-away + DW acceleration<br>*Mean rank change on DW leg after each WM (lower=better) · n=4* | ★★★★★ | 0.0% |
| F4 | **Leeward Mark Rounding**<br>Wide-in/tight-out line, daggerboard timing, hardening to close-hauled<br>*Mean rank change on UW leg after each LM (lower=better) · n=4* | ★★★★★ | -0.7% |

## Observational Categories (Coach Manual Entry)

| CODE | CATEGORY | TIER (★/5) | VALUE |
|---|---|---|---|
| A1 | **Attitude & Discipline**<br>Training diligence, respect for team rules, behavior at regatta<br>*Strong learning motivation but focus occasionally lapses.* | ★★★★★ | HIGH |
| A2 | **Physique & Body Build**<br>Height, weight, leverage for fin/rig; suitability for class<br>*Weight management required.* | ★½☆☆☆ | LOW |
| A4 | **Learning Attitude**<br>Willingness to review debriefs, ask questions, self-analyze<br>*Strong will to learn.* | ★★★★★ | HIGH |
| B1 | **Racing Rules Knowledge**<br>RRS 10-17 application, port/stbd avoidance, mark rounding rules<br>*Not enough information to assess.* | ☆☆☆☆☆ | N/A |
| B2 | **Equipment Setup**<br>Mast step, outhaul, downhaul systems<br>*Understands basic setup method but needs far more experience.* | ★½☆☆☆ | LOW |
| B3 | **Condition-based Trimming**<br>Adjusts downhaul/outhaul, daggerboard pivot as wind builds; reacts to gusts<br>*Needs much more understanding and experience with daggerboard use and track management.* | ★½☆☆☆ | LOW |
| E1 | **Upwind Pumping Technique**<br>T293-legal pumping technique upwind above 6 kn (IWA rule)<br>*Needs significant training.* | ★½☆☆☆ | LOW |
| E2 | **Downwind Pumping Technique**<br>Coordinated body/rig pumping for DW acceleration<br>*Needs significant training.* | ★½☆☆☆ | LOW |

**Tier system:** 5★ gold · 4.5★ emerald · 3.5★ sky · 2.5★ amber · 1.5★ orange · 0.5★ red.

**GPS-inferred proxies:** C1 side-choice match vs Top 5 · C2 fleet percentile at first WM rounding · C5 % of starts in top half at first WM · F1/F2 UW/DW VMG % of Class Top 5 · F3/F4 mean rank change on post-rounding leg (≤1% = gold, >15% = red).

## 5 Training Prescription — Next 90 Days

Prioritized by gap size to Class Top 5 benchmark and observational gaps.

**1** **Close the Upwind VMG gap (41% → 90%)**

**Drill:** Closing-speed drills with GPS watch; pinching vs footing decisions in varying chop; long beats in 8–12 kn focusing on heel angle, hiking, mast-track position

**Target:** Reach 90% of Class Top 5 in Upwind VMG within 6 months

**2** **Build confidence in C-band conditions (50% of Top 5, n=1 races)**

**Drill:** Medium-wind race practice 9–12 kn: start line holds, boat-handling, tactics in fleet racing

**Target:** Close the gap to 85% in C-band races through focused training camps

**3** **Complete all 18 observational ratings (A1–F4)**

**Drill:** Schedule 1:1 debrief with head coach; review MetaSail replays from Foça; self-assess with video

**Target:** Full 24-category evaluation matrix completed by end of April 2026
